

Subpart 16.1 - Selecting Contract Types

Parent topic: [Part 16 - Types of Contracts](#)

16.101 General.

(a) A wide selection of contract types is available to the Government and contractors in order to provide needed flexibility in acquiring the large variety and volume of *supplies* and services required by agencies. Contract types vary according to-

(1) The degree and timing of the responsibility assumed by the contractor for the costs of performance; and

(2) The amount and nature of the profit incentive offered to the contractor for achieving or exceeding specified standards or goals.

(b) The contract types are grouped into two broad categories: fixed-price contracts (see [subpart 16.2](#)) and cost-reimbursement contracts (see [subpart 16.3](#)). The specific contract types range from firm-fixed-price, in which the contractor has full responsibility for the performance costs and resulting profit (or loss), to cost-plus-fixed-fee, in which the contractor has minimal responsibility for the performance costs and the negotiated fee (profit) is fixed. In between are the various incentive contracts (see [subpart 16.4](#)), in which the contractor's responsibility for the performance costs and the profit or fee incentives offered are tailored to the uncertainties involved in contract performance.

16.102 Policies.

(a) Contracts resulting from sealed bidding *shall* be firm-fixed-price contracts or fixed-price contracts with economic price adjustment.

(b) Contracts negotiated under [part 15](#) *may* be of any type or combination of types that will promote the Government's interest, except as restricted in this part (see [10 U.S.C. 3321\(a\)](#) and [41 U.S.C. 3901](#)). Contract types not described in this regulation *shall* not be used, except as a deviation under [subpart 1.4](#).

(c) The cost-plus-a-percentage-of-cost system of *contracting shall* not be used (see [10 U.S.C. 3322\(a\)](#) and [41 U.S.C. 3905\(a\)](#)). Prime contracts (including letter contracts) other than firm-fixed-price contracts *shall*, by an appropriate clause, prohibit cost-plus-a-percentage-of-cost subcontracts (see clauses prescribed in [subpart 44.2](#) for cost-reimbursement contracts and [subparts 16.2](#) and [16.4](#) for fixed-price contracts).

(d) No contract *may* be awarded before the execution of any determination and findings (D&F's) required by this part. Minimum requirements for the content of D&F's required by this part are specified in [1.704](#).

16.103 Negotiating contract type.

(a) Selecting the contract type is generally a matter for negotiation and requires the exercise of sound judgment. Negotiating the contract type and negotiating prices are closely related and *should* be considered together. The objective is to negotiate a contract type and price (or estimated cost and fee) that will result in reasonable contractor risk and provide the contractor with the greatest incentive for efficient and economical performance.

(b) A firm-fixed-price contract, which best utilizes the basic profit motive of business enterprise, *shall* be used when the risk involved is minimal or can be predicted with an acceptable degree of certainty. However, when a reasonable basis for firm *pricing* does not exist, other contract types *should* be considered, and negotiations *should* be directed toward selecting a contract type (or combination of types) that will appropriately tie profit to contractor performance.

(c) In the course of an *acquisition* program, a series of contracts, or a single long-term contract, changing circumstances *may* make a different contract type appropriate in later periods than that used at the outset. In particular, *contracting officers should* avoid protracted use of a cost-reimbursement or time-and-materials contract after experience provides a basis for firmer *pricing*.

(d)

(1) Each contract file *shall* include documentation to show why the particular contract type was selected. This *shall* be documented in the *acquisition* plan, or in the contract file if a written *acquisition* plan is not required by agency procedures.

(i) Explain why the contract type selected *must* be used to meet the agency need.

(ii) Discuss the Government's additional risks and the burden to manage the contract type selected (*e.g.*, when a cost-reimbursement contract is selected, the Government incurs additional cost risks, and the Government has the additional burden of managing the contractor's costs). For such instances, *acquisition* personnel *shall* discuss –

(A) How the Government identified the additional risks (*e.g.*, pre-award survey, or *past performance* information);

(B) The nature of the additional risks (*e.g.*, inadequate contractor's accounting system, weaknesses in contractor's internal control, non-compliance with Cost Accounting Standards, or lack of or inadequate *earned value management system*); and

(C) How the Government will manage and mitigate the risks.

(iii) Discuss the Government resources necessary to properly plan for, award, and administer the contract type selected (*e.g.*, resources needed and the additional risks to the Government if adequate resources are not provided).

(iv) For other than a firm-fixed price contract, at a minimum the documentation *should* include –

(A) An analysis of why the use of other than a firm-fixed-price contract (*e.g.*, cost reimbursement, time and materials, labor hour) is appropriate;

(B) Rationale that detail the particular facts and circumstances (*e.g.*, complexity of the

requirements, uncertain duration of the work, contractor's technical capability and financial responsibility, or adequacy of the contractor's accounting system), and associated reasoning essential to support the contract type selection;

(C) An assessment regarding the adequacy of Government resources that are necessary to properly plan for, award, and administer other than firm-fixed-price contracts; and

(D) A discussion of the actions planned to minimize the use of other than firm-fixed-price contracts on future *acquisitions* for the same requirement and to transition to firm-fixed-price contracts to the maximum extent practicable.

(v) A discussion of why a level-of-effort, price redetermination, or fee provision was included.

(2) Exceptions to the requirements at (d)(1) of this section are –

(i) Fixed-price *acquisitions* made under *simplified acquisition procedures*;

(ii) Contracts on a firm-fixed-price basis other than those for *major systems* or research and development; and

(iii) Awards on the set-aside portion of sealed bid partial set-asides for small business.

16.104 Factors in selecting contract types.

There are many factors that the *contracting officer should* consider in selecting and negotiating the contract type. They include the following:

(a) *Price competition*. Normally, effective price competition results in realistic *pricing*, and a fixed-price contract is ordinarily in the Government's interest.

(b) *Price analysis*. Price analysis, with or without competition, *may* provide a basis for selecting the contract type. The degree to which price analysis can provide a realistic *pricing* standard *should* be carefully considered. (See [15.404-1\(b\)](#).)

(c) *Cost analysis*. In the absence of effective price competition and if price analysis is not sufficient, the cost estimates of the *offeror* and the Government provide the bases for negotiating contract *pricing* arrangements. It is essential that the uncertainties involved in performance and their possible impact upon costs be identified and evaluated, so that a contract type that places a reasonable degree of cost responsibility upon the contractor can be negotiated.

(d) *Type and complexity of the requirement*. Complex requirements, particularly those unique to the Government, usually result in greater risk assumption by the Government. This is especially true for complex research and development contracts, when performance uncertainties or the likelihood of changes makes it difficult to estimate performance costs in advance. As a requirement recurs or as quantity production begins, the cost risk *should* shift to the contractor, and a fixed-price contract *should* be considered.

(e) *Combining contract types*. If the entire contract cannot be firm-fixed-price, the *contracting officer shall* consider whether or not a portion of the contract can be established on a firm-fixed-price basis.

(f) *Urgency of the requirement*. If urgency is a primary factor, the Government *may* choose to assume a greater proportion of risk or it *may offer* incentives tailored to performance outcomes to ensure timely contract performance.

(g) *Period of performance or length of production run*. In times of economic uncertainty, contracts extending over a relatively long period *may* require economic price adjustment or price redetermination clauses.

(h) *Contractor's technical capability and financial responsibility*.

(i) *Adequacy of the contractor's accounting system*. Before agreeing on a contract type other than firm-fixed-price, the *contracting officer shall* ensure that the contractor's accounting system will permit timely development of all necessary cost data in the form required by the proposed contract type. This factor *may* be critical-

(1) When the contract type requires price revision while performance is in progress; or

(2) When a cost-reimbursement contract is being considered and all current or past experience with the contractor has been on a fixed-price basis. See [42.302\(a\)\(12\)](#).

(j) *Concurrent contracts*. If performance under the proposed contract involves concurrent operations under other contracts, the impact of those contracts, including their *pricing* arrangements, *should* be considered.

(k) *Extent and nature of proposed subcontracting*. If the contractor proposes extensive subcontracting, a contract type reflecting the actual risks to the prime contractor *should* be selected.

(l) *Acquisition history*. Contractor risk usually decreases as the requirement is repetitively acquired. Also, product descriptions or descriptions of services to be performed can be defined more clearly.

16.105 Solicitation provision.

The *contracting officer shall* complete and insert the provision at [52.216-1](#), Type of Contract, in a *solicitation* unless it is for-

(a) A fixed-price *acquisition* made under *simplified acquisition procedures*; or

(b) Information or planning purposes.
