34.202 Integrated Baseline Reviews.

- (a) When an EVMS is required, the Government will conduct an Integrated Baseline Review (IBR).
- (b) The purpose of the IBR is to verify the technical content and the realism of the related performance budgets, resources, and schedules. It *should* provide a mutual understanding of the inherent risks in *offerors'*/ contractors' performance plans and the underlying management control systems, and it *should* formulate a plan to handle these risks.
- (c) The IBR is a joint assessment by the offeror or contractor, and the Government, of the-
- (1) Ability of the project's technical plan to achieve the objectives of the scope of work;
- (2) Adequacy of the time allocated for performing the defined tasks to successfully achieve the project schedule objectives;
- (3) Ability of the Performance Measurement Baseline (PMB) to successfully execute the project and attain cost objectives, recognizing the relationship between budget resources, funding, schedule, and scope of work;
- (4) Availability of personnel, facilities, and equipment when required, to perform the defined tasks needed to execute the program successfully; and
- (5) The degree to which the management process provides effective and integrated technical/schedule/cost planning and baseline control.
- (d) The timing and conduct of the IBR *shall* be in accordance with agency procedures. If a pre-award IBR will be conducted, the *solicitation must* include the procedures for conducting the IBR and address whether *offerors* will be reimbursed for the associated costs. If permitted, reimbursement of *offerors*' pre-award IBR costs is governed by the provisions of FAR <u>part 31</u>.
