

Subpart 36.6 - Architect-Engineer Services

Parent topic: [Part 36 - Construction and Architect-Engineer Contracts](#)

36.600 Scope of subpart.

This subpart prescribes policies and procedures applicable to the *acquisition* of *architect-engineer services*, including orders for *architect-engineer services* under multi-agency contracts (see [16.505\(a\)\(9\)](#)).

36.601 Policy.

36.601-1 Public announcement.

The Government *shall* publicly announce all requirements for *architect-engineer services* and negotiate contracts for these services based on the demonstrated competence and qualifications of prospective contractors to perform the services at fair and reasonable prices. (See [40 U.S.C. 1101 et seq.](#))

36.601-2 Competition.

Acquisition of architect-engineer services in accordance with the procedures in this subpart will constitute a competitive procedure. (See [6.102\(d\)\(1\)](#).)

36.601-3 Applicable contracting procedures.

(a)

(1) For facility design contracts, the statement of work *shall* require that the architect-engineer specify, in the *construction* design specifications, use of the maximum practicable amount of *recovered materials* consistent with the performance requirements, availability, price reasonableness, and cost-effectiveness. Where appropriate, the statement of work also *shall* require the architect-engineer to consider energy conservation, *pollution prevention*, and *waste reduction* to the maximum extent practicable in developing the *construction* design specifications.

(2) Facility design *solicitations* and contracts that include the specification of energy-consuming *products* must comply with the requirements at [subpart 23.2](#).

(b) Sources for contracts for *architect-engineer services* shall be selected in accordance with the procedures in this subpart rather than the *solicitation* or source selection procedures prescribed in [parts 13, 14, and 15](#) of this regulation.

(c) When the contract statement of work includes both *architect-engineer services* and other

services, the *contracting officer shall* follow the procedures in this subpart if the statement of work, substantially or to a dominant extent, specifies performance or approval by a registered or licensed architect or engineer. If the statement of work does not specify such performance or approval, the *contracting officer shall* follow the procedures in [parts 13, 14, or 15](#).

(d) Other than "incidental services" as specified in the definition of *architect-engineer services* in [2.101](#) and in [36.601-4\(a\)\(3\)](#), services that do not require performance by a registered or licensed architect or engineer, notwithstanding the fact that architect-engineers also *may* perform those services, *should* be acquired pursuant to [parts 13, 14, and 15](#).

36.601-4 Implementation.

(a) *Contracting officers should* consider the following services to be "*architect-engineer services*" subject to the procedures of this subpart:

(1) Professional services of an architectural or engineering nature, as defined by applicable State law, which the State law requires to be performed or approved by a registered architect or engineer.

(2) Professional services of an architectural or engineering nature associated with design or *construction* of real property.

(3) Other professional services of an architectural or engineering nature or services incidental thereto (including studies, investigations, surveying and mapping, tests, evaluations, consultations, comprehensive planning, program management, conceptual designs, plans and specifications, *value engineering*, *construction* phase services, soils engineering, drawing reviews, preparation of operating and maintenance manuals and other related services) that logically or justifiably require performance by registered architects or engineers or their employees.

(4) Professional surveying and mapping services of an architectural or engineering nature. Surveying is considered to be an architectural and engineering service and *shall* be procured pursuant to section [36.601](#) from registered surveyors or architects and engineers. Mapping associated with the research, planning, development, design, *construction*, or alteration of real property is considered to be an architectural and engineering service and is to be procured pursuant to section [36.601](#). However, mapping services that are not connected to traditionally understood or accepted architectural and engineering activities, are not incidental to such architectural and engineering activities or have not in themselves traditionally been considered architectural and engineering services *shall* be procured pursuant to provisions in [parts 13, 14, and 15](#).

(b) *Contracting officers may* award contracts for *architect-engineer services* to any firm permitted by law to practice the professions of architecture or engineering.

36.602 Selection of firms for architect-engineer contracts.

36.602-1 Selection criteria.

(a) Agencies *shall* evaluate each potential contractor in terms of its-

(1) Professional qualifications necessary for satisfactory performance of required services;

(2) Specialized experience and technical competence in the type of work required, including, where appropriate, experience in energy conservation, *pollution prevention*, *waste reduction*, and the use of *recovered materials*;

(3) Capacity to accomplish the work in the required time;

(4) *Past performance* on contracts with Government agencies and private industry in terms of cost control, quality of work, and compliance with performance schedules;

(5) Location in the general geographical area of the project and knowledge of the locality of the project; provided, that application of this criterion leaves an appropriate number of qualified firms, given the nature and size of the project; and

(6) Acceptability under other appropriate evaluation criteria.

(b) When the use of design competition is approved by the *agency head* or a designee, agencies *may* evaluate firms on the basis of their conceptual design of the project. Design competition *may* be used when-

(1) Unique situations exist involving prestige projects, such as the design of memorials and structures of unusual national significance;

(2) Sufficient time is available for the production and evaluation of conceptual designs; and

(3) The design competition, with its costs, will substantially benefit the project.

(c) Hold discussions with at least three of the most highly qualified firms regarding concepts, the relative utility of alternative methods and feasible ways to prescribe the use of *recovered materials* and achieve *waste reduction* and energy-efficiency in facility design (see [part 23](#)).

36.602-2 Evaluation boards.

(a) When acquiring *architect-engineer services*, an agency *shall* provide for one or more permanent or ad hoc architect-engineer evaluation boards (which *may* include preselection boards when authorized by agency regulations) to be composed of members who, collectively, have experience in architecture, engineering, *construction*, and Government and related *acquisition* matters. Members *shall* be appointed from among highly qualified professional employees of the agency or other agencies, and if authorized by agency procedure, private practitioners of architecture, engineering, or related professions. One Government member of each board *shall* be designated as the chairperson.

(b) No firm *shall* be eligible for award of an architect-engineer contract during the period in which any of its principals or associates are participating as members of the awarding agency's evaluation board.

36.602-3 Evaluation board functions.

Under the general direction of the *head of the contracting activity*, an evaluation board *shall*

perform the following functions:

- (a) Review the current data files on eligible firms and responses to a public notice concerning the particular project (see [36.603](#)).
- (b) Evaluate the firms in accordance with the criteria in [36.602-1](#).
- (c) Hold discussions with at least three of the most highly qualified firms regarding concepts and the relative utility of alternative methods of furnishing the required services.
- (d) Prepare a selection report for the *agency head* or other designated selection authority recommending, in order of preference, at least three firms that are considered to be the most highly qualified to perform the required services. The report *shall* include a description of the discussions and evaluation conducted by the board to allow the selection authority to review the considerations upon which the recommendations are based.

36.602-4 Selection authority.

- (a) The final selection decision *shall* be made by the *agency head* or a designated selection authority.
- (b) The selection authority *shall* review the recommendations of the evaluation board and *shall*, with the advice of appropriate technical and staff representatives, make the final selection. This final selection *shall* be a listing, in order of preference, of the firms considered most highly qualified to perform the work. If the firm listed as the most preferred is not the firm recommended as the most highly qualified by the evaluation board, the selection authority *shall* provide for the contract file a written explanation of the reason for the preference. All firms on the final selection list are considered "selected firms" with which the *contracting officer may* negotiate in accordance with [36.606](#).
- (c) The selection authority *shall* not add firms to the selection report. If the firms recommended in the report are not deemed to be qualified or the report is considered inadequate for any reason, the selection authority *shall* record the reasons and return the report through channels to the evaluation board for appropriate revision.
- (d) The board *shall* be promptly informed of the final selection.

36.602-5 Short selection process for contracts not to exceed the simplified acquisition threshold.

When authorized by the agency, either or both of the short processes described in this subsection may be used to select firms for contracts not expected to exceed the *simplified acquisition threshold*. Otherwise, the procedures prescribed in [36.602-3](#) and [36.602-4](#) *shall* be followed.

- (a) *Selection by the board.* The board *shall* review and evaluate architect-engineer firms in accordance with [36.602-3](#), except that the selection report *shall* serve as the final selection list and *shall* be provided directly to the *contracting officer*. The report *shall* serve as an authorization for the *contracting officer* to commence negotiations in accordance with [36.606](#).
- (b) *Selection by the chairperson of the board.* When the board decides that formal action by the

board is not necessary in connection with a particular selection, the following procedures *shall* be followed:

(1) The chairperson of the board *shall* perform the functions required in [36.602-3](#).

(2) The *agency head* or designated selection authority *shall* review the report and approve it or return it to the chairperson for appropriate revision.

(3) Upon receipt of an approved report, the chairperson of the board *shall* furnish the *contracting officer* a copy of the report which will serve as an authorization for the *contracting officer* to commence negotiations in accordance with [36.606](#).

36.603 Collecting data on and appraising firms qualifications.

(a) *Establishing offices.* Agencies *shall* maintain offices or permanent evaluation boards, or arrange to use the offices or boards of other agencies, to receive and maintain data on firms wishing to be considered for Government contracts. Each office or board *shall* be assigned a jurisdiction by its parent agency, making it responsible for a geographical region or area, or a specialized type of *construction*.

(b) *Qualifications data.* To be considered for architect-engineer contracts, a firm *must* file with the appropriate office or board the [Standard Form 330](#), "Architect-Engineer Qualifications," Part II, and when applicable, [SF 330](#), Part I.

(c) *Data files and the classification of firms.* Under the direction of the parent agency, offices or permanent evaluation boards *shall* maintain an architect-engineer qualifications data file. These offices or boards *shall* review the [SF 330](#) filed, and *shall* classify each firm with respect to-

(1) Location;

(2) Specialized experience;

(3) Professional capabilities; and

(4) Capacity, with respect to the scope of work that can be undertaken. A firm's ability and experience in computer-assisted design *should* be considered, when appropriate.

(d) *Currency of files.* Any office or board maintaining qualifications data files *shall* review and update each file at least once a year. This process *should* include:

(1) Encouraging firms to submit annually an updated statement of qualifications and performance data on a [SF 330](#), Part II.

(2) Reviewing the [SF 330](#), Part II, and, if necessary, updating the firm's classification (see [36.603\(c\)](#)).

(3) Recording any contract awards made to the firm in the past year.

(4) Assuring that the file contains a copy of each pertinent performance evaluation (see [42.1502\(f\)](#)).

(5) Discarding any material that has not been updated within the past three years, if it is no longer pertinent, see [42.1502\(f\)](#).

(6) Posting the date of the review in the file.

(e) *Use of data files.* Evaluation boards and other appropriate Government employees, including *contracting officers*, shall use data files on firms.

36.604 Performance evaluation.

See [42.1502\(f\)](#) for the requirements for preparing *past performance* evaluations for architect-engineer contracts.

36.605 Government cost estimate for architect-engineer work.

(a) An independent Government estimate of the cost of *architect-engineer services* shall be prepared and furnished to the *contracting officer* before commencing negotiations for each proposed contract or *contract modification* expected to exceed the *simplified acquisition threshold*. The estimate shall be prepared on the basis of a detailed analysis of the required work as though the Government were submitting a proposal.

(b) Access to information concerning the Government estimate shall be limited to Government personnel whose official duties require knowledge of the estimate. An exception to this rule may be made during contract negotiations to allow the *contracting officer* to identify a specialized task and disclose the associated cost breakdown figures in the Government estimate, but only to the extent deemed necessary to arrive at a fair and reasonable price. The overall amount of the Government's estimate shall not be disclosed except as permitted by agency regulations.

36.606 Negotiations.

(a) Unless otherwise specified by the selection authority, the final selection authorizes the *contracting officer* to begin negotiations. Negotiations shall be conducted in accordance with [part 15](#) of this chapter, beginning with the most preferred firm in the final selection (see [15.404-4\(c\)\(4\)\(i\)](#) on fee limitation).

(b) The *contracting officer* should ordinarily request a proposal from the firm, ensuring that the *solicitation* does not inadvertently preclude the firm from proposing the use of modern design methods.

(c) The *contracting officer* shall inform the firm that no *construction* contract may be awarded to the firm that designed the project, except as provided in [36.209](#).

(d) During negotiations, the *contracting officer* should seek advance agreement (see [31.109](#)) on any charges for computer-assisted design. When the firm's proposal does not cover appropriate modern and cost-effective design methods (*e.g.*, computer-assisted design), the *contracting officer*

should discuss this topic with the firm.

(e) Because selection of firms is based upon qualifications, the extent of any subcontracting is an important negotiation topic. The clause prescribed at [44.204\(b\)](#), Subcontractors and Outside Associates and Consultants (*Architect-Engineer Services*) (see [52.244-4](#)), limits a firm's subcontracting to firms agreed upon during negotiations.

(f) If a mutually satisfactory contract cannot be negotiated, the *contracting officer shall* obtain a written final proposal revision from the firm, and notify the firm that negotiations have been terminated. The *contracting officer shall* then initiate negotiations with the next firm on the final selection list. This procedure *shall* be continued until a mutually satisfactory contract has been negotiated. If negotiations fail with all selected firms, the *contracting officer shall* refer the matter to the selection authority who, after consulting with the *contracting officer* as to why a contract cannot be negotiated, *may* direct the evaluation board to recommend additional firms in accordance with [36.602](#).

36.607 Release of information on firm selection.

(a) After final selection has taken place, the *contracting officer may* release information identifying only the architect-engineer firm with which a contract will be negotiated for certain work. The work *should* be described in any release only in general terms, unless information relating to the work is classified. If negotiations are terminated without awarding a contract to the highest rated firm, the *contracting officer may* release that information and state that negotiations will be undertaken with another (named) architect-engineer firm. When an award has been made, the *contracting officer may* release award information (see [5.401](#)).

(b) Debriefings of successful and unsuccessful firms will be held after final selection has taken place and will be conducted, to the extent practicable, in accordance with [15.503](#), [15.506\(b\)](#) through (f), and [15.507\(c\)](#). Note that [15.506\(d\)\(2\)](#) through (d)(5) do not apply to architect-engineer contracts.

36.608 Liability for Government costs resulting from design errors or deficiencies.

Architect-engineer contractors *shall* be responsible for the professional quality, technical accuracy, and coordination of all services required under their contracts. A firm *may* be liable for Government costs resulting from errors or deficiencies in designs furnished under its contract. Therefore, when a modification to a *construction* contract is required because of an error or deficiency in the services provided under an architect-engineer contract, the *contracting officer* (with the advice of technical personnel and legal counsel) *shall* consider the extent to which the architect-engineer contractor *may* be reasonably liable. The *contracting officer shall* enforce the liability and issue a demand for payment of the amount due, if the recoverable cost will exceed the administrative cost involved or is otherwise in the Government's interest. The *contracting officer shall* include in the contract file a written statement of the reasons for the decision to recover or not to recover the costs from the firm.

36.609 Contract clauses.

36.609-1 Design within funding limitations.

(a) The Government *may* require the architect-engineer contractor to design the project so that *construction* costs will not exceed a contractually specified dollar limit (funding limitation). If the price of *construction* proposed in response to a Government *solicitation* exceeds the *construction* funding limitation in the architect-engineer contract, the firm *shall* be solely responsible for redesigning the project within the funding limitation. These additional services *shall* be performed at no increase in the price of this contract. However, if the cost of proposed *construction* is affected by events beyond the firm's reasonable control (*e.g.*, if there is an increase in material costs which could not have been anticipated, or an undue delay by the Government in issuing a *construction solicitation*), the firm *shall* not be obligated to redesign at no cost to the Government. If a firm's design fails to meet the contractual limitation on *construction* cost and the Government determines that the firm *should* not redesign the project, a written statement of the reasons for that determination *shall* be placed in the contract file.

(b) The amount of the *construction* funding limitation (to be inserted in paragraph (c) of the clause at [52.236-22](#)) is to be established during negotiations between the contractor and the Government. This estimated *construction* contract price *shall* take into account any statutory or other limitations and exclude any allowances for Government supervision and overhead and any amounts set aside by the Government for contingencies. In negotiating the amount, the *contracting officer should* make available to the contractor the information upon which the Government has based its initial *construction* estimate and any subsequently acquired information that *may* affect the *construction* costs.

(c) The *contracting officer shall* insert the clause at [52.236-22](#), Design Within Funding Limitations, in fixed-price architect-engineer contracts except when-

- (1) The *head of the contracting activity* or a designee determines *in writing* that cost limitations are secondary to performance considerations and additional project funding can be expected, if necessary;
- (2) The design is for a standard structure and is not intended for a specific location; or
- (3) There is little or no design effort involved.

36.609-2 Redesign responsibility for design errors or deficiencies.

(a) Under architect-engineer contracts, contractors *shall* be required to make necessary corrections at no cost to the Government when the designs, drawings, specifications, or other items or services furnished contain any errors, deficiencies, or inadequacies. If, in a given situation, the Government does not require a firm to correct such errors, the *contracting officer shall* include a written statement of the reasons for that decision in the contract file.

(b) The *contracting officer shall* insert the clause at [52.236-23](#), Responsibility of the Architect-Engineer Contractor, in fixed-price architect-engineer contracts.

36.609-3 Work oversight in architect-engineer contracts.

The *contracting officer shall* insert the clause at 52.236-24, Work Oversight in Architect-Engineer Contracts, in all architect-engineer contracts.

36.609-4 Requirements for registration of designers.

Insert the clause at 52.236-25, Requirements for Registration of Designers, in architect-engineer contracts, except that it *may* be omitted when the design will be performed-

- (a) Outside the *United States* and its *outlying areas*; or
- (b) In a State or outlying area of the *United States* that does not have registration requirements for the particular field involved.
