

11-1. Internal Controls

- a. Effective internal controls are essential to reducing the risk inherent in the Army GPC Program and maintaining its integrity and accountability. Internal controls are necessary to ensure the achievement of organizational objectives; operational effectiveness and efficiency; reliable financial reporting; and compliance with laws, regulations, and policies. The Army has established a series of automated and manual internal controls and oversight procedures designed to identify and mitigate risk, document the effectiveness of controls, and provide data to effectively target corrective actions where and when needed.
- b. A key portion of the automated oversight process, the SAHAR, provides the HCA/SCO with a high-level summary of the scope, internal control effectiveness, level of risk, and corrective actions implemented or required across the Army GPC program. One of the major strengths of these controls and procedures is the aggressive inclusion of automation applied to control points, data-mining, and reporting that enforce laws, regulation, and policy, reducing the administrative cost of effective oversight.
- c. Automation is incorporated in the control/oversight/reporting process through several integrated applications sharing data throughout the entire process, from automated identity verification and supervisor approval in PIEE, to training reports from DAU to PIEE, to JAM appointments with purchase limitations communicated to the card-issuing bank for account establishment, to transaction information data-mined in IOD, and automated reporting across the entire scope of the process. This extensive automation increases the efficiency, accuracy, auditability, and reliability of the oversight process and the integrity and safety of the GPC Program.
- d. GPC management officials are responsible for establishing a process of internal controls that (1) provides reasonable assurance that the GPC program is used efficiently, effectively, and legally to help manage the program and reduce violations; and (2) complies with applicable laws and regulations. Management should periodically review their GPC program's internal controls and avail themselves of the Monthly A/OPC Review and SAHAR reports, along with any other reports, to ensure the internal controls covered in specified reports are being followed and GPC program participants are performing responsibly.
