## INSTRUCTIONS

1. Individual sureties on bonds executed in connection with Government contracts must complete and submit this form with the bond. (See 48 CFR 28.203, 53.228(e).) The surety must have the completed form notarized.
2. No corporation, partnership, or other unincorporated association or firm, as such, is acceptable as an individual surety. Likewise, members of a partnership are not acceptable as sureties on bonds that a partnership or an association, or any co-partner or member thereof, is the principal obligor. However, stockholders of corporate principals are acceptable provided (a) their qualifications are independent of their stockholdings or financial interest therein, and (b) that the fact is expressed in the affidavit of justification. An individual surety will not include any financial interest in assets connected with the principal on the bond that this affidavit supports.
3. United States citizenship is a requirement for individual sureties for contracts and bonds when the contract is awarded in the United States. However, when the Contracting Officer is located in an outlying area or a foreign country, the individual surety is only required to be a permanent resident of the area or country in which the contracting officer is located.
4. All signatures of the affidavit submitted must be originals. Affidavits bearing reproduced signatures are not acceptable. An authorized person must sign the bond. Any person signing in a representative capacity (e.g., an attorney-in-fact) must furnish evidence of authority if that representative is not a member of a firm, partnership, or joint venture, or an officer of the corporation involved.

## ARCHITECT-ENGINEER QUALIFICATIONS

OMB No.: 9000-0157  
Expires: 12/31/2006

Public reporting burden for this collection of information is estimated to average a total of 29 hours per response (25 hours for Part 1 and 4 hours for Part 2), including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the FAR Secretariat (MVA), Regulatory and Federal Assistance Publications Division, GSA, Washington, DC 20405.

### PURPOSE

Federal agencies use this form to obtain information from architect-engineer (A-E) firms about their professional qualifications. Federal agencies select firms for A-E contracts on the basis of professional qualifications as required by the Brooks A-E Act (40 U.S.C. 1101 - 1104) and Part 36 of the Federal Acquisition Regulation (FAR).

The Brooks A-E Act requires the public announcement of requirements for A-E services (with some exceptions provided by other statutes), and the selection of at least three of the most highly qualified firms based on demonstrated competence and professional qualifications according to specific criteria published in the announcement. The Act then requires the negotiation of a contract at a fair and reasonable price starting first with the most highly qualified firm.

The information used to evaluate firms is from this form and other sources, including performance evaluations, any additional data requested by the agency, and interviews with the most highly qualified firms and their references.

### GENERAL INSTRUCTIONS

Part I presents the qualifications for a specific contract.

Part II presents the general qualifications of a firm or a specific branch office of a firm. Part II has two uses:

1. An A-E firm may submit Part II to the appropriate central, regional or local office of each Federal agency to be kept on file. A public announcement is not required for certain contracts, and agencies may use Part II as a basis for selecting at least three of the most highly qualified firms for discussions prior to requesting submission of Part I. Firms are encouraged to update Part II on file with agency offices, as appropriate, according to FAR Part 36. If a firm has branch offices, submit a separate Part II for each branch office seeking work.

2. Prepare a separate Part II for each firm that will be part of the team proposed for a specific contract and submitted with Part I. If a firm has branch offices, submit a separate Part II for each branch office that has a key role on the team.

### INDIVIDUAL AGENCY INSTRUCTIONS

Individual agencies may supplement these instructions. For example, they may limit the number of projects or number of

pages submitted in Part I in response to a public announcement for a particular project. Carefully comply with any agency instructions when preparing and submitting this form. Be as concise as possible and provide only the information requested by the agency.

### DEFINITIONS

**Architect-Engineer Services:** Defined in FAR 2.101.

**Branch Office:** A geographically distinct place of business or subsidiary office of a firm that has a key role on the team.

**Discipline:** Primary technical capabilities of key personnel, as evidenced by academic degree, professional registration, certification, and/or extensive experience.

**Firm:** Defined in FAR 36.102.

## Part II - General Qualifications

See the "General Instructions" on page 1 for firms with branch offices. Prepare Part II for the specific branch office seeking work if the firm has branch offices.

1. Solicitation Number. If Part II is submitted for a specific contract, insert the agency's solicitation number and/or project number, if applicable, exactly as shown in the public announcement or agency request.

2a-2e. Firm (or Branch Office) Name and Address. Self-explanatory.

3. Year Established. Enter the year the firm (or branch office, if appropriate) was established under the current name.

4. DUNS Number. Insert the Data Universal Numbering System number issued by Dun and Bradstreet Information Services. Firms must have a DUNS number. See FAR Part 4.6.

5. Ownership.

a. Type. Enter the type of ownership or legal structure of the firm (sole proprietor, partnership, corporation, joint venture, etc.).

b. Small Business Status. Refer to the North American Industry Classification System (NAICS) code in the public announcement, and indicate if the firm is a small business according to the current size standard for that NAICS code (for example, Engineering Services (part of NAICS 541330), Architectural Services (NAICS 541310), Surveying and Mapping Services (NAICS 541370)). The small business categories and the internet website for the NAICS codes appear in FAR Part 19. Contact the requesting agency for any questions. Contact your local U.S. Small Business Administration office for any questions regarding Business Status.

6a-6c. Point of Contact. Provide this information for a representative of the firm that the agency can contact for additional information. The representative must be empowered to speak on contractual and policy matters.

7. Name of Firm. Enter the name of the firm if Part II is prepared for a branch office.

8a-8c. Former Firm Names. Indicate any other previous names for the firm (or branch office) during the last six years. Insert the year that this corporate name change was

effective and the associated DUNS Number. This information is used to review past performance on Federal contracts.

9. Employees by Discipline. Use the relevant disciplines and associated function codes shown at the end of these instructions and list in the same numerical order. After the listed disciplines, write in any additional disciplines and leave the function code blank. List no more than 20 disciplines. Group remaining employees under "Other Employees" in column b. Each person can be counted only once according to his/her primary function. If Part II is prepared for a firm (including all branch offices), enter the number of employees by disciplines in column c(1). If Part II is prepared for a branch office, enter the number of employees by discipline in column c(2) and for the firm in column c(1).

10. Profile of Firm's Experience and Annual Average Revenue for Last 5 Years. Complete this block for the firm or branch office for which this Part II is prepared. Enter the experience categories which most accurately reflect the firm's technical capabilities and project experience. Use the relevant experience categories and associated profile codes shown at the end of these instructions, and list in the same numerical order. After the listed experience categories, write in any unlisted relevant project experience categories and leave the profile codes blank. For each type of experience, enter the appropriate revenue index number to reflect the professional services revenues received annually (averaged over the last 5 years) by the firm or branch office for performing that type of work. A particular project may be identified with one experience category or it may be broken into components, as best reflects the capabilities and types of work performed by the firm. However, do not double count the revenues received on a particular project.

11. Annual Average Professional Services Revenues of Firm for Last 3 Years. Complete this block for the firm or branch office for which this Part II is prepared. Enter the appropriate revenue index numbers to reflect the professional services revenues received annually (averaged over the last 3 years) by the firm or branch office. Indicate Federal work (performed directly for the Federal Government, either as the prime contractor or subcontractor), non-Federal work (all other domestic and foreign work, including Federally-assisted projects), and the total. If the firm has been in existence for less than 3 years, see the definition for "Annual Receipts" under FAR 19.101.

12. Authorized Representative. An authorized representative of the firm or branch office must sign and date the completed form. Signing attests that the information provided is current and factual. Provide the name and title of the authorized representative who signed the form.

However, where the Sureties are corporations acting as co-sureties, we, the Sureties, bind ourselves in such sum "jointly and severally" as well as "severally" only for the purpose of allowing a joint action or actions against any or all of us. ### CERTIFICATE

This is to certify that the undersigned, individually, and as an authorized representative of the Contractor, has examined this termination settlement proposal and that, to the best knowledge and belief of the undersigned:

(a) AS TO THE CONTRACTOR'S OWN CHARGES. The proposed settlement (exclusive of charges set forth in Item 14) and supporting schedules and explanations have been prepared from the books of account and records of the Contractor in accordance with recognized commercial accounting practices; they include only those charges allocable to the terminated portion of this contract; they have been prepared with knowledge that they will, or may, be used directly or indirectly as the basis of settlement of a termination settlement proposal or claim against an agency of the United States; and the charges as stated are fair and reasonable.

(b) AS TO THE SUBCONTRACTORS' CHARGES. (1) The Contractor has examined, or caused to be examined, to an extent it considered adequate in the circumstances, the termination settlement proposals of its immediate subcontractors (exclusive of proposals filed against these immediate subcontractors by their subcontractors); (2) The settlements on account of immediate subcontractors own charges are fair and reasonable, the charges are allocable to the terminated portion of this contract, and the settlements were negotiated in good faith and are not more favorable to its immediate subcontractors than those that the Contractor would make if reimbursement by the Government were not involved; (3) The Contractor has received from all its immediate subcontractors appropriate certificates with respect to their termination settlement proposals, which certificates are substantially in the form of this certificate; and (4) The Contractor has no information leading it to doubt (i) the reasonableness of the settlements with more remote subcontractors or (ii) that the charges for them are allocable to this contract. Upon receipt by the Contractor of amounts covering settlements with its immediate subcontractors, the Contractor will pay or credit them promptly with the amounts so received, to the extent that it has not previously done so. The term "subcontractors," as used above, includes suppliers.

NOTE: The Contractor shall, under conditions stated in FAR 15.403, be required to submit a Certificate of Current Cost or Pricing Data (see FAR 15.406-2 and 15.408 Table 15-2).

**CERTIFICATE**

This is to certify that the undersigned, individually, and as an authorized representative of the Contractor, has examined this termination settlement proposal and that, to the best knowledge and belief of the undersigned:

(a) AS TO THE CONTRACTOR'S OWN CHARGES. The proposed settlement (exclusive of charges set forth in Item 14) and supporting schedules and explanations have been prepared from the books of account and records of the Contractor in accordance with recognized commercial accounting practices; they include only those charges allocable to the terminated portion of this contract; they have been prepared with knowledge that they will, or may, be used directly or indirectly as the basis of settlement of a termination settlement proposal or claim against an agency of the United States; and the charges as stated are fair and reasonable.

(b) AS TO THE SUBCONTRACTORS' CHARGES. (1) The Contractor has examined, or caused to be examined, to an extent it considered adequate in the circumstances, the termination settlement proposals of its immediate subcontractors (exclusive of proposals filed against these immediate subcontractors by their subcontractors); (2) The settlements on account of immediate subcontractors own charges are fair and reasonable, the charges are allocable to the terminated portion of this contract, and the settlements were negotiated in good faith and are not more favorable to its immediate subcontractors than those that the Contractor would make if reimbursement by the Government were not involved; (3) The Contractor has received from all its immediate subcontractors appropriate certificates with respect to their termination settlement proposals, which certificates are substantially in the form of this certificate; and (4) The Contractor has no information leading it to doubt (i) the reasonableness of the settlements with more remote subcontractors or (ii) that the charges for them are allocable to this contract. Upon receipt by the Contractor of amounts covering settlements with its immediate subcontractors, the Contractor will pay or credit them promptly with the amounts so received, to the extent that it has not previously done so. The term "subcontractors," as used above, includes suppliers.

NOTE: The Contractor shall, under conditions stated in FAR 15.403, be required to submit a Certificate of Current Cost or Pricing Data (see FAR 15.406-2 and 15.408 Table 15-2).

## INSTRUCTIONS

1. This settlement proposal should be submitted to the contracting officer, if you are a prime contractor, or to your customer, if you are a subcontractor. The term contract as used hereinafter includes a subcontract or a purchase order.

2. Proposals that would normally be included in a single settlement proposal, such as those based on a series of separate orders for the same item under one contract should be consolidated wherever possible, and must not be divided in such a way as to bring them below \$10,000.

3. You should review any aspects of your contract relating to termination and consult your customer or contracting officer for further information. Government regulations pertaining to the basis for determining a fair and reasonable termination settlement are contained in Part 49 of the Federal Acquisition Regulation. Your proposal for fair compensation should be prepared on the basis of the costs shown by your accounting records. Where your costs are not so shown, you may use any reasonable basis for estimating your costs which will provide for fair compensation for the preparations made and work done for the terminated portion of the contract, including a reasonable profit on such preparation and work.

4. Generally your settlement proposal may include under Items 2, 3, and 4, the following:

a. **COSTS** - Costs incurred which are rea-

sonably necessary and are properly allocable to the terminated portion of your contract under recognized commercial accounting practices, including direct and indirect manufacturing, selling and distribution, administrative, and other costs and expenses incurred.

b. **SETTLEMENT WITH SUBCONTRACTORS** - Reasonable settlements of proposals of subcontractors allocable to the terminated portion of the subcontract. Copies of such settlements will be attached hereto.

c. **SETTLEMENT EXPENSES** - Reasonable costs of protecting and preserving termination inventory in your possession and preparing your proposal.

d. **PROFIT** - A reasonable profit with respect to the preparations you have made and work you have actually done for the terminated portion of your contract. No profit should be included for work which has not been done, nor shall profit be included for settlement expenses, or for settlement with subcontractors.

5. If you use this form, your total charges being proposed (line 5), must be less than \$10,000. The Government has the right to examine your books and records relative to this proposal, and if you are a subcontractor, your customer must be satisfied with your proposal.

IN CONSIDERATION OF PARTIAL PAYMENT THAT MAY BE MADE, THE APPLICANT AGREES AS FOLLOWS:

(a) Repayment of Excess. **Cost Basis.** For all contracts with Small Business concerns, the base for progress payments is total costs incurred. For contracts with concerns other than Small Business, the progress payment base will be the total recorded paid costs, together with the incurred costs per the Computation of Amounts paragraph of the progress payment clause in FPR 1-30.510-11 (a) or FAR 52.232-16, as appropriate. Total costs include all expenses paid and incurred, including applicable manufacturing and production expense, general and administrative expense for performance of contract, which are reasonable, allocable to the contract, consistent with sound and generally accepted accounting principles and practices, and which are not otherwise excluded by the contract.

**Manufacturing and Production Expense, General and Administrative Expense.** In connection with the first progress payment request on a contract, attach an explanation of the method, bases and period used in determining the amount of each of these two types of expenses. If the method, bases or periods used for computing these expenses differ in subsequent requests for progress payments under this contract, attach an explanation of such charges to the progress payment request involved.

### SECTION II - SPECIFIC INSTRUCTIONS

Item 9. PAID COSTS ELIGIBLE UNDER PROGRESS PAYMENT CLAUSE - Line 9 will not be used for Small Business Contracts.

Item 9 shall include only those recorded costs which have resulted at time of request in payment made by cash, check, or other form of actual payment for items or services purchased directly for the contract. This includes items delivered, accepted and paid for, resulting in liquidation of subcontractor progress payments.

Costs to be shown in Item 9 are not to include advance payments, downpayments, or deposits, all of which are not eligible for reimbursement; or progress payments made to subcontractors, suppliers or others, which are to be included in Item 14. See "Cost Basis" above.

Item 10. INCURRED COSTS ELIGIBLE UNDER PROGRESS PAYMENT CLAUSE - For all Small Business Contracts, Item 10 will show total costs incurred for the contract.

Costs to be shown in Item 10 are not to include advance payments, downpayments, deposits, or progress payments made to subcontractors, suppliers or others.

For large business contracts, costs to be shown in Item 10 shall include all costs incurred (see "Cost Basis" above) for: materials which have been issued from the stores inventory and placed into production process for use on the contract; for direct labor; for other direct in-house costs; and for properly allocated and allowable indirect costs as set forth under "Cost Basis" above.

Item 12a. Enter the total contract costs incurred to date; if the actual amount is not known, enter the best possible estimate. If an estimate is used, enter (E) after the amount.

Item 12b. Enter the estimated cost to complete the contract. The estimate may be the last estimate made, adjusted for costs incurred since the last estimate; however, estimates shall be made not less frequently than every six months.

Items 14a through 14e. Include only progress payments on subcontracts which conform to progress payment provisions of the prime contract.

Item 14a. Enter only progress payments actually paid.

Item 14b. Enter total progress payments recouped from subcontractors.

Item 14d. For Small Business prime contracts, include the amount of unpaid subcontract progress payment billings which have been approved by the contractor for the current payment in the ordinary course of business. For other contracts, enter "0" amount.

**SECTION III - SPECIFIC INSTRUCTIONS.** This Section must be completed only if the contractor has received advance payments against this contractor, or if items have been delivered, invoiced and accepted as of the date indicated in the heading of Section II above. EXCEPTION: Item 27 must be filled in by the Contracting Officer.

Item 20a. Of the costs reported in Item 11, compute and enter only costs which are properly allocable to items delivered, invoiced and accepted to the applicable date. In order of preference, these costs are to be computed on the basis of one of the following: (a) The actual unit cost of items delivered, giving proper consideration to the deferral of the starting load costs or, (b) projected unit costs (based on experienced costs plus the estimated cost to complete the contract), where the contractor maintains cost data which will clearly establish the reliability of such estimates.

Item 20d. Enter amount from 14e.

Item 21a. Enter the total billing price, as adjusted, of items delivered, accepted and invoiced to the applicable date.

Item 23. Enter total progress payments liquidated and those to be liquidated from billings submitted but not yet paid.

## SUPPLEMENTAL INVOICING INFORMATION

If desired, this order (or a copy thereof) may be used by the Contractor as the Contractor's invoice, instead of a separate invoice, provided the following statement, (signed and dated) is on (or attached to) the order: "Payment is requested in the amount of \$ \_\_\_\_\_. No other invoice will be submitted." However, if the Contractor wishes to submit an invoice, the following information must be provided: contract number (if any), order number, item number(s), description of supplies or service, sizes, quantities, unit prices, and extended totals. ## PART III—PREAMBLES PUBLISHED UNDER THE FAR SYSTEM

### **PREAMBLE A TO 30.404, CAPITALIZATION OF TANGIBLE ASSETS**

This final rule, in Federal Acquisition Circular (FAC) 84-38, revises 30.404-40(b)(1), 30.404-60(a)(1), and 30.404-60(a)(1)(i).

#### SUMMARY

Section 30.404 requires that contractors have written policies for capitalization which must include a minimum acquisition cost criterion of \$1000. The standard is being amended to raise the threshold to \$1500. The purpose of the change is to permit contractors to adopt practices appropriate in today's economy.

**Effective Date:** The effective date of this modification is September 19, 1988.

#### BACKGROUND

**Supplementary Information.** The CAS Board established the minimum acquisition cost criterion for capitalization at \$500 when it originally promulgated CAS 404 in 1973. The Board's initial \$500 limitation encompassed the practices of 97 percent of the companies whose Disclosure Statements were filed with the Board. In the promulgation comments to the Standard, the Board recommended that the special limits in the standard "...may need to be reviewed in the future...(and will be revised) promptly if developments warrant a change."

On March 3, 1980, the Board did revise the limitation upward to \$1000 as it recognized that circumstances had changed significantly since the promulgation of Standard 404. The Board found that the performance of several official indices showed increases from 60 to 80 percent, and a survey of companies not influenced by the limitation of Standard 404 showed a significant number using \$1000 as the minimum criterion for capitalization.

The impact of inflation has continued over the 7 years since 1980, although at a lower level. Indices from the Commerce Department for the implicit price deflators on nonresidential structures and machinery and equipment showed increases from 30 to 35 percent over the period 1979 through 1985. When applied to the current \$1000 criterion, this yields values from \$1300 to \$1350. In addition, economic projections showed inflation levels rising slightly from 1986 through 1989. Consequently, this change increases the minimum acquisition cost criterion for capitalization of tangible capital assets to \$1500 to cover both actual and projected price increases.

The amendment which is now being promulgated is derived directly from the proposed rule which was published in the *Federal Register* on July 9, 1986 (51 FR 24971), with an invitation for interested parties to submit comments.

Four letters of comment were received on the July 9, 1986, proposal. Only one letter directly addressed the appropriateness of the proposed revisions to 30.404. That comment stated that inflation should not be the motivating factor in determining significant costs for capitalization, but rather materiality of the cost should be the factor in determining significance.

The CAS Board's comments in the CAS 404 preamble and its action to increase the capitalization threshold based upon inflation, discussed above, indicate that the Board considered the materiality

and significance of asset acquisition cost to be directly related to the level of prices in the economy. The Defense Acquisition Regulations Council and the Civilian Agency Acquisition Council agree with the CAS Board's outlook on this matter and expect the increase in capitalization threshold provided in this modification to 30.404 will be beneficial to Government contract costing by not requiring capitalization of assets that are of insignificant value.

### **PREAMBLE A TO 30.416, ACCOUNTING FOR INSURANCE COSTS**

This final rule, in Federal Acquisition Circular (FAC) 84-38, revises 30.416-50(a)(3)(ii).

#### SUMMARY

FAR 30.416-50(a)(3)(ii) revisions delete the requirement to use state rates in discounting certain self-insured losses to present value.

**Effective Date:** The effective date of this modification is September 19, 1988.

This modification shall be followed by each contractor on or after the start of its next cost accounting period, beginning after receipt of a contract to which this modification is applicable.

#### BACKGROUND

**Supplementary Information.** Section 30.416 provides that the amount of insurance cost to be assigned to a cost accounting period is the projected average loss (PAL) for that period plus insurance administration expense in that period. The PAL is either the insurance premium, where the risk of loss is covered by the purchase of insurance, or a self-insurance charge, where the exposure to risk is not covered by the purchase of insurance. Where it is probable that the actual amount of losses will not differ significantly from the PAL, the actual amount of losses may be considered to represent the PAL for the period as the self-insurance charge.

In self-insurance, when the actual amount of losses is being used to represent the PAL, contractors are to discount those losses to present value, where payments to the claimant will not take place for over a year after the loss occurs. If a state provides a discount rate for computing lump-sum settlements, 30.416 requires that the state rate be used for computing present value. Otherwise, the Pub. L. 92-41 Treasury rate is to be used. The differing rates specified by the states, and the lack of specified rates in some states, result in inconsistent treatment of self-insurance charges on defense contracts.

The purpose of requiring a present value computation for contract cost accounting purposes is to recognize the time value of money for funds advanced to and used by the contractor for extended periods before being disbursed. The Pub. L. 92-41 Treasury rate is generally specified for this purpose. The majority of state laws covering worker's compensation insurance specify a rate in the range of 3-6 percent. The use of a low rate results in a larger settlement than would use of a current money market rate. The purpose of low state rates is to discourage lump-sum settlements. This purpose is unrelated to that of fair valuation for contract cost accounting purposes. The use of state rates may produce inaccurate measures of present values and will most certainly create inconsistencies in the pricing of

contracts due to the lack of consistent determinations of present values. Consequently, the proposed rule, published in the *Federal Register* on July 8, 1986 (51 FR 24788), deleted the reference to state discount rates at 30.416-50(a)(3)(ii) and required use of the Pub. L. 92-41 Treasury rate in all cases.

Four comments were received in response to the proposed rule. None of the comments directly challenged the appropriateness of the proposed revision. Therefore, no changes were made to the proposed rule as a result of the public comments.
